## **OUR VERDICT**

FOR the serious golfer, there is only one reason not to invest in Galvin Green and that is the cost. At almost £450 for the suit, if that's too much for you then fair enough.

But what must be set against this price tag is that those who do make the investment are almost never disappointed.

For a start, Galvin suits last for years so you won't be forced to splash out again in 12 months' time.

Then there is the Swedish company's legendary attention to detail. Every year their suits improve. This season, for example, the Alf trousers are available in over 25 sizes. Some things never change, though, and Gore-Tex remains the outstanding fabric when it comes to waterproof and breathable garments.

Galvin Green, then, retain their crown here at NCG. And we are sure that you will agree with this conclusion if you invest in one of their suits.
